You need the right data to make the right decisions. And you need to get it quickly and efficiently. Spend more time conducting analysis and less on retrieving and managing data with Xpressfeed – a powerful data feed management solution.

Streamline your data management
Xpressfeed capitalizes on the combined strengths of S&P Global Market Intelligence and select third-party vendors to help you enhance your proprietary analytics, financial portals, CRM systems, and more.

Deep Data from a Single Source
We’ll help you:

• Obtain the foundational data needed to power sophisticated quantitative research and modeling

• Focus on your strategic investment objectives with a database that incorporates thousands of automated and manual data quality checks to review content before it is published

• Realize greater control and transparency over your data repository

Seamless, Speedy Delivery
Xpressfeed provides a single integrated data source in item-level transaction files. The comprehensive data warehouse includes all the necessary foundational data sets required to power sophisticated quantitative research and modeling. Information is delivered in packages so you can customize and receive only the data you want and need.

With Xpressfeed, you can:

• Tap into over 120 data sets including point-in-time financials, estimates and information on people intelligence, ownership, corporate relationship, key developments, and other non-financial details

• Access fundamental and market data on over 91,000 active and inactive global securities, including daily pricing history, industry classifications, and total returns

• Review credit ratings from S&P Global Ratings, Fitch, and Moody’s; ratings content is organized into packages defined by issuer sectors and contains issuer- and issue-level details

• Take advantage of the industry’s most comprehensive database of corporate actions and security mappings

• Leverage a cross reference suite of products that will allow you to link across entities using a variety of entity level identifiers

• Benchmark the performance of investments, including those that represent broad market segments with index data integrated and linked to S&P Global Market Intelligence data

• Perform detailed company analysis by leveraging our integrated database of private and public companies; access information on over 2.9 million private companies globally and robust financial data from 2004 forward on over 750,000 private companies
Integrated data to enhance your proprietary analytics, financial portals, CRM systems, and more

Quantitative

S&P Capital IQ Premium Financials
All instances of standardized financial data on an annual, quarterly, semi-annual, last twelve month and year-to-date basis. This includes all representations of a financial period including press releases, original filings and all restatements. These files contain the seven industry templates of an S&P Capital IQ presentation (Industrial, Bank, Capital Markets, Financial Services, Insurance, REITs and Utilities) as well as over 5,000 financial, supplemental and industry-specific data items for active and inactive public companies.

Compustat® Financials
Comprised of standardized North American and global company fundamental and market data for active and inactive publicly-traded companies. North American Coverage includes annual fundamental data back to 1950, quarterly data and monthly market data back to 1962, and daily market data back to 1984. Global coverage includes annual and quarterly fundamental and daily market data back to 1986, with 20-year rolling monthly market data.

SNL Financials
Leading coverage of the Financial Institutions (FIG) and Real Estate sectors includes over 1,400 detailed industry data points on over 17,500 current and historical companies globally. Historical annual and interim data is available as far back as 1990 for certain data sets and geographies. Worldwide FIG content includes comprehensive fundamental coverage of over 14,000 banking institutions and over 1,500 insurance companies. Bank fundamental coverage provides detailed insights into performance analysis, asset quality, regulatory capital, and deposit/loan composition while insurance fundamentals provide increased insight into investment level details, underwriting analysis, solvency, embedded value, and distribution channels. Key features of the Global Real Estate content include comprehensive fundamental coverage of over 1,600 REITs, REOCs and Listed Property Companies with detailed insights into debt and lease maturities, same store performance, and portfolio analysis including development exposure.

Capital Structure
Detailed information about the debt and equity aspects of a company's capital structure. Debt capital structure data covers over 51,000 public and private companies and equity capital structure data on over 81,000 public and select private companies worldwide.

Bank Regulatory
Provides bank regulatory and financial forms data filed with federal banking agencies, including the Federal Deposit Insurance Corporation (FDIC) as well as the Federal Financial Institutions Examination Council (FFIEC). FDIC regulatory filings cover over 20,000 banks and their subsidiaries, delivering information on over 900 unique data items with history available back to 1976. FFIEC regulatory filings include over 3,500 banks and their subsidiaries, delivering information on over 800 unique data items with history available back to 1986.

Private Company Financials
Financial statement and ratio data on over 750,000 companies throughout Europe, North America and South Korea. The data is from 2004 forward.
Cross Reference Services

Business Entity Cross Reference Service
Extensive linkages between entities, companies and issuers on over 2 million entities. Use of the S&P Capital IQ Company ID as the primary key and cross reference company identifiers from a range of sources – both standardized and proprietary. This approach enables us to rapidly incorporate new identifiers as they are introduced while ensuring reliability and consistency.

Industry Sector Cross Reference Services
Industry sector classifications linked at the company level using the S&P Capital IQ Company Id. Industry classifications include: GICS, S&P Capital IQ ETF classifications, S&P Ratings Sectors, NACE, ANZSIC, SIC, NAICS and ICB Sector classifications.

Global Instruments Cross Reference Service
A comprehensive database of security identifiers cross-referencing almost 11 million instruments recognized all over the globe that minimizes the impact on back-office systems and operations, while facilitating cross-border communications. Based on a global securities database and covers: Equity, Fixed Income, Mutual Funds, Indexes, and more.

Qualitative Data

Company Intelligence
Profiles of public and private firms worldwide including company contact information, competitors, financial auditors and summary or detailed-level business descriptions.

People Intelligence
Profiles of professionals including biography, contact data, education, compensation, affiliations, and corporate board memberships.

Key Developments
Information on more than one million key developments from over 20,000 news sources including press releases, regulatory filings, company web sites, web mining, and call transcripts.

Transactions
Profiles of M&A, private placement, venture capital, PIPE, spin-off, bankruptcies, share buyback programs and equity/debt public offerings. Each transaction has a synopsis, deal size, company participants, advisors coverage and associated filings. The global transaction database provides up to 10 years of history.

Business Relationships
Details on a company’s customers, suppliers, strategic alliances, and key relationship types.

Private Equity
Private equity firm profiles including investment professionals, limited partners, investment criteria, areas of interest, and fund data.

Creditstats Direct™
An analytics service that provides adjusted financial statement data from S&P Global Ratings, including criteria, research, credit ratings, credit-adjusted financials and ratios. The data covers more than 700 rated global banks and 2,700 rated corporates and utilities. CreditStats Direct enables you to programmatically enhance your credit scoring modeling, analysis, and risk evaluation methods in a more efficient manner.
Estimates

**S&P Capital IQ Estimates**
Standardized database of global, real-time financial forecasting measures, such as upgrades/downgrades, target price revisions, and market-moving news. Also includes estimates based on projections, models, analysis and research from analysts, brokers and the companies themselves. Annual, quarterly, and semi-annual time periods. History is from 1996 for international companies and from 1999 for U.S. companies. Our new intra-day package gives you the most timely estimates and guidance, with updates and revisions available up to every five minutes. Detailed historical equity ownership data on over 55,000 public and private companies worldwide consisting of institutional, mutual fund and insider/individual owners. Also available are the portfolio performance statistics, aggregated investor classifications, and the public float data.

Indices & Constituents

**S&P Dow Jones Indices**

**MSCI**
Index- and constituent security-level data for the MSCI global equity benchmark indices. Daily and monthly index-level history for developed markets is from 1970, in addition to daily and monthly history for emerging markets from 1987. Constituent-level data is available for both developed and emerging markets. A rolling 13 months of daily data history and a rolling seven years of monthly data history is available.

**Russell**
Index- and constituent security-level data reflecting changes and adjustments to index composition and constituent weightings for the U.S. and MicroCap Russell indices. Current and historical constituent data with monthly history back to 1978 and index daily market data back to 1984 is available.

**FTSE**
Index- and constituent security-level data reflecting changes and adjustments to index composition and constituent weightings for the FTSE UK index series. Current and historical constituent data history back to 2001, and daily index market data back to 1992 is available.

Ownership

**S&P Capital IQ Ownership**
Detailed historical equity ownership data on over 55,000 public and private companies worldwide consisting of institutional, mutual fund and insider/individual owners. Also available are the portfolio performance statistics, aggregated investor classifications, and the public float data.

Industry Classifications

**GICS Direct**
A joint product of S&P Capital IQ Global Market Intelligence and MSCI, GICS Direct includes the current classification for active companies in more than 120 countries and provides more than 44,000 company classifications and covers over 54,000 global securities.
GICS Historical Databases
GICS historical databases (GICS North America History, GICS International History and GICS Global History) are available as add-on products and provide historical company-level global industry classification codes. The amount of history varies by company, with the earliest start date being 1985.

ETF Style Classifications
The S&P Capital IQ ETF Data package provides a comprehensive database of more than 2,900 publicly traded North American Exchange-Traded Products (ETP), including both Exchange-Traded Funds (ETF) and Exchange-Traded Notes.

Credit Ratings

S&P Global Credit Ratings
Credit ratings on more than 9,000 global issuers including corporates, financial institutions, and insurance companies; 600 sovereigns, and international and U.S. public finance entities; and 15,000 structured finance transactions.

Moody’s
Credit Ratings on rated fixed-income issuers and securities for public, corporate, and structured finance, as well as for rated sale, class and issue level securities.

Fitch
Comprehensive coverage includes 9,000 entities, the industry’s leading source of bank ratings, four levels of market sector indexing, over 100 fields of issuer data, and 25 distinct rating types, including recovery, national, local currency, country ceiling, market sensitivity, and viability ratings.

Stock Selection & Risk Models

Alpha Factor Library
The Alpha Factor Library is the most comprehensive collection of global equity selection signals available today. The Library covers both developed and emerging markets and is composed of hundreds of stock selection signals that reflect standard investment approaches among equity investors in the alpha and risk space.

Credit Indicators

Probability of Default (PD)
Statistical measures that are calculated utilizing a proprietary model—PD Model Market Signals Corporates—that translates stock price volatility into credit risk indicators in order to provide daily estimates of the probability that an entity will not meet its contractual obligations. Data is available daily for publicly traded companies.

Market Derived Signals (MDS)
Statistical measures that are calculated utilizing a proprietary model—Market Derived Signals Model—that evaluates CDS spreads in order to provide an early warning of potential credit changes and capture the market’s daily view of a company’s perceived risk. There are approximately 1,500 entities that have an MDS, a figure that fluctuates depending on the number of CDS that are in the marketplace. Data is available daily for scored entities.

Credit Default Swap (CDS)
CDS, although not credit risk indicators in themselves, are used for monitoring how the market views the credit risk across a wide range of companies and financial institutions and banks. The offering contains the 5-year CDS spread content.
Reliable data delivery and management

Xpressfeed’s turnkey data loading and maintenance technology provides a reliable and efficient solution to data delivery and management you can trust.

Xpressfeed’s loader application has automatic schema generation that simplifies maintenance and enables a fully-populated database to be up and running quickly. Additionally, the loader runs on your side, giving you greater control over when and how the data is processed in your depository.

What You Want, When You Want It

- Supports Microsoft SQL Server® and Oracle® databases
- Lets you focus on your business instead of the technology
- Reduces the time and complexity of data management

Flexible and Compatible

Xpressfeed offers the flexibility and compatibility you are seeking in a data platform. The open database design allows you to utilize data both within our desktop tools, as well as your own analytical systems and products.

Easily specify which feeds to load and when to load them
Many helpful features

• Permanent unique identifiers are assigned to each company, security and trading item
• Embedded mapping across vendors allows for seamless cross-vendor data usage
• Transaction files are delivered daily to capture up-to-date data for your research and analysis
